## 2.4 PAYMENT FOR SERVICE RENDERED (cont'd)

## 2.4.3 Payment of Charges

Charges for facilities and service, other than usage charges, are due monthly in advance. All other charges are payable upon request of the Company. All payments must be made by credit card or bank draft, and to the extent the Company permits other forms of payment, customer will incur an additional \$5 processing fee for each payment made by any other means. Service may be suspended if customer fails to provide and maintain correct and complete billing information. 2.9 SUSPENSION OR TERMINATION OF SERVICE

2.9.1

The Company may refuse or terminate service to a customer under the following conditions except as provided in subsections (2) and (3) of this section:

(a) For noncompliance with the Company's tariffed rules or commission administrative regulations. The Company may terminate service for failure to comply with applicable tariffed rules or commission administrative regulations pertaining to that service. However, Company shall not terminate or refuse service to any customer for noncompliance with its tariffed rules or commission administrative regulations without first having made a reasonable effort to obtain customer compliance. After such effort by the Company, service may be terminated or refused only after the customer has been given at least ten (10) days written termination notice pursuant to 807 KAR 5:006 Section 13(5).

(b) For dangerous conditions. If a dangerous condition relating to the Company's service which could subject any person to imminent harm or result in substantial damage to the property of the Company or others is found to exist on the customer's premises, the service shall be refused or terminated without advance notice. The Company shall notify the customer immediately in writing and, if possible, orally of the reasons for the termination or refusal. Such notice shall be recorded by the Company and shall include the corrective action to be taken by the customer or Company before service can be restored or provided.

(c) For refusal of access. When a customer refuses or neglects to provide reasonable access to the premises for installation, operation, maintenance or removal of Company property, the Company may terminate or refuse service. Such action shall be taken only when corrective action negotiated between the Company and customer has failed to resolve the situation and after the customer has been given at least ten (10) days' written notice of termination pursuant to 807 KAR 5:006 Section 13(5).

(d) For outstanding indebtedness. The Company shall not be required to furnish new service to any customer who is indebted to the Company for service furnished or other tariffed charges until that customer has paid his indebtedness.

(e) For noncompliance with state, local or other codes. The Company may refuse or terminate service to a customer if the customer does not comply with state, municipal or other codes, rules and administrative regulations applying to such service. The Company may terminate service pursuant to this subsection only after ten (10) days' written notice

(f) For nonpayment of bills. The Company may terminate service at a point of delivery for nonpayment of charges incurred for Company service at that point of delivery; however, Company shall not terminate service to a customer for nonpayment of bills for any tariffed charge without first having mailed or otherwise delivered an advance termination notice which complies with the requirements of 807 KAR 5:006 Section 13(5).

## 2.12 ALLOWANCE FOR INTERRUPTIONS IN SERVICE

Interruption in service, which are not due to the negligence of, or non-compliance with the provisions of this Tariff by the Customer, or the operation or malfunction of the facilities, power, or equipment provided by the Customer, will be credited to the Customer as set forth below for the part of the service that the interruption affects. A credit allowance will be made when an interruption occurs because of a failure of any component furnished by the Company under this Tariff.

## 2.12.1 Credit for Interruptions

- a. An interruption period begins when the Customer reports a service, facility, or circuit to be interrupted and releases it for testing and repair. An interruption period ends when the service, facility, or circuit is operative. If the Customer reports a service, facility, or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.
- b. For calculating credit allowances, every month is considered to have 30 days. A credit allowance is applied on a pro rata basis against the rates specified hereunder and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit.
- c. A credit allowance will be given, upon request of the customer to the business office, for interruption of 30 minutes or more. Credit allowance will be calculated as follows:
  - i) if interruption continues for less than 24 hours:
    - a) 1/30th of the monthly rate if it is the first interruption in the same billing period.
    - b) 2/30ths of the monthly rate if there was a previous interruption of at least 24 hours in the same billing period.
  - ii) if interruption continues for more than 24 hours:
    - a) if caused by storm, fire, flood or other condition out of Company's control, 1/30th of the monthly rate for each 24 hours of interruption.

  - ii. (cont'd)
    - b) for other interruption, 1/30 of the monthly rate for the first 24 hours and 2/30ths of such rate for each additional 24 hours (or fraction thereof); however, if service is interrupted for over 24 hours, more than once in the same billing period, the 2/30ths allowances applies to the first 24 hours of the second and subsequent interruptions.

Two or more interruptions of 15 minutes or more during any 24-hour period shall be considered as one interruption.

- d. Credit to Customer  
Credits attributable to any billing period for interruptions of service shall not exceed the total charges for that period for the service and facilities furnished by the Company rendered useless or substantially impaired.
- e. Interruption Defined  
For the purpose of applying this provision, the word interruption shall mean the inability to complete calls either incoming or outgoing or both due to equipment malfunction or human errors. Interruption does not include and no allowance shall be given for service difficulties such as slow dial tone, circuits busy or other network and /or switching capacity shortages. Nor shall the interruption allowance apply where service is interrupted by the negligence or willful act of the subscriber or where the Company suspends or terminates service because of nonpayment of bills due to the Company, unlawful or improper use of the facilities or service, or any other reason covered by the Tariff. No allowance shall be made for interruptions due to electric power failure where, by the provisions of this Tariff, the customer is responsible for providing electric power.

Section 5 - SUPPLEMENTAL SERVICES

## 5.1 CUSTOM CALLING SERVICE

## 5.1.1 General

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all classes of service. Transmission levels may not be sufficient in all cases.

## 5.1.2 Description of Features

## a. Three Way Calling/Call Hold

The Three Way Calling feature allows a customer to add a third party to an existing two-way call and form a 3-way call. The call must have been originated from outside the station group and terminate to a station within the station group. The Call Hold feature allows a customer to put any in-progress call on hold by flashing the switchhook and dialing a code. This frees the line to allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.

## b. Call Forwarding

Call Forwarding, when activated, redirects attempted terminating calls to another customer-specific line. The customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedures. Call originating ability is not affected by Call Forwarding. Only one call per line can be forwarded at a time.

The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the customer with the Call Forwarding is billed for the forwarded leg of the call.

Call Forwarding - Busy automatically reroutes an incoming call to a customer predesignated number when the called number is busy.

Call Forwarding - Don't Answer automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within the number of rings programmed by the Company.

b. Call Forwarding (cont'd)

Call Forwarding - Variable allows the customer to choose to reroute incoming calls to another specified telephone number. The customer must activate and deactivate this feature. Only one call per line can be forwarded at a time.

c. Call Waiting/Cancel Call Waiting

Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

d. Distinctive Ringing

This feature enables a user to determine the source of an incoming call from a distinctive ring. The user is provided with up to two additional telephone numbers.

e. Regular Multiline Hunting

This feature is a line hunting arrangement that provides sequential search of available numbers within a multiline group.

f. Speed Calling

This feature allows a user to dial selected numbers using one or two digits. Up to eight numbers (single digit, or thirty numbers with two digits) can be selected.

5.2.2 Description of Features

a. Call ID

The Call ID feature allows a customer to see the subscriber name and associated number previewed on a display screen before the call is answered allowing a customer to prioritize and/or screen incoming calls. Call ID records the name, number, date and time of each incoming call - including calls that are not answered by the customer. Call ID service requires the use of specialized CPE not provided by the Company. It is the responsibility of the customer to provide the necessary CPE.

b. Automatic Redial

The Automatic Redial feature allows a customer to automatically redial the last number dialed. This is accomplished by the customer activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then redials the call for the customer.

The Automatic Redial feature also allows customers, having reached a busy number, to dial a code before hanging up. Automatic Redial feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically redialed and the customer is notified of the connected call via a distinctive ring.

The following types of calls cannot be Automatically Redialed:

- Calls to 800 Service numbers
- Calls to 900 Service numbers
- Calls preceded by an interexchange carrier access code
- International Direct Distance Dialed calls
- Calls to Directory Assistance
- Calls to 911

d. Customer Originated Trace

Customer Originated Trace allows customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the Company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the Company the customer can use this application to combat nuisance calls.
